RESEARCH INTERESTS

Industrial Organisation: How AI and other general-purpose technologies change market structure
Economics of General-Purpose Technologies: Economic impacts of AI on firms, industries and productivity
Technological Substitution: Substitution from outside the market, when AI rather than a rival replaces a product

WORKING PAPERS

Market Concentration and AI Adoption: Evidence from US Industries
Veejay Kathuria | Working paper, 2026
Concentration does not predict how fast US industries adopt AI. A positive 2023 association with adoption levels is driven by information, finance and professional services, and adoption tracks the type of work instead.

PROPOSED RESEARCH

Substitution from Outside the Market: General-Purpose AI and Incumbent Products
When large language models substitute for a product, how do incumbents' prices, sales and market concentration change, and do standard measures such as HHI misread that change? Starting with IT services.

EDUCATION

Cranfield University — Cranfield, UK
MSc in Finance, Merit (62.5%) — 2023 – 2024
- Applied Research Methods in Finance: 77% (Distinction)
- Other modules: Derivatives 74%, Investment 72%, International Financial Markets 71%, M&A 70%
- Thesis: *Impact of Policy Uncertainty on Performance of Private Equity Funds*
- Head of Cranfield Finance Society

Maharaja Agrasen Institute of Technology — New Delhi, India
B.Tech in Information Technology, First Division — 2016 – 2020

RESEARCH EXPERIENCE

Mardels Research — London, UK
Independent Researcher — Present
- Publish independent cross-asset research on the macro picture and one or two active themes at a time
- Keep a public, timestamped record of every call, so each view can be checked against outcomes

OTHER EXPERIENCE

Outlier — Remote
Advanced Mathematics Annotator — Apr 2024 – May 2024
- Annotated and evaluated advanced mathematics content used to train AI models

VSK Fincom Pvt Ltd — New Delhi, India
Founder — Sep 2020 – Aug 2023
- Built a product that cut margin requirements on derivative trades with hedges calibrated to each user's risk
- Developed 10+ Python trading strategies running on live brokerage APIs

PROJECTS

- **Bobby AI:** market assistant giving real-time updates and scenario analysis via research retrieval and tool use
- **Derivatives Pricing in Python:** Black-Scholes and binomial-tree option pricing with numerical Greeks

TESTS, CERTIFICATIONS AND SKILLS

Tests: GRE 318 (Quantitative 167, Verbal 151)
Certifications: CFA Level I passed, Level II candidate; ACCA (part qualified); Bloomberg (3 certifications)
Skills and Languages: Python, SQL, Excel, Bloomberg, Capital IQ; English and Hindi (fluent), French (basic)
