RESEARCH INTERESTS

Industrial Organisation: How AI and other general-purpose technologies change market structure
Economics of General-Purpose Technologies: Economic impacts of AI on firms, industries and productivity
Technological Substitution: Substitution risk from the technology itself, not only from rival firms

CURRENT RESEARCH

Competition Without Competitors *(working title)*
Examines whether a general-purpose technology can itself become the substitute, as when a software firm loses ground to an AI model that can replicate its product from a prompt rather than to a rival firm, and how this changes concentration and market structure.

EDUCATION

Cranfield University — Cranfield, UK
MSc in Finance — 2023 – 2024
- Thesis: *Impact of Policy Uncertainty on Performance of Private Equity Funds*
- Head of Cranfield Finance Society

Maharaja Agrasen Institute of Technology — New Delhi, India
B.Tech in Information Technology — 2016 – 2020

RESEARCH EXPERIENCE

Mardels Research — London, UK
Independent Researcher — Present
- Publish independent cross-asset research on the macro picture and one or two active themes at a time
- Keep a public, timestamped record of every call, so each view can be checked against outcomes
- Studied AI's uneven effects across sectors and firms, which motivated my current research

PROFESSIONAL EXPERIENCE

Flashpoint Ventures — London, UK
Venture Scout — Jun 2025 – Present
- Diligenced early-stage companies on market size, traction and unit economics, with around 20 reviewed to date
- Benchmarked each company against comparable funding rounds before recommending it to the partners

Outlier — Remote
Advanced Mathematics Annotator — Apr 2024 – May 2024
- Annotated and evaluated advanced mathematics content used to train AI models

Alpine Capital — London, UK
Private Equity Intern — Jan 2024 – May 2024
- Built 5 LBO models on live deals worth over £10M, testing IRR, cash flow and downside sensitivity
- Wrote 3 investment memos using comparables and precedent transactions, each with a proceed or pass call

VSK Fincom Pvt Ltd — New Delhi, India
Founder — Sep 2020 – Aug 2023
- Built a product that cut margin requirements on derivative trades with hedges calibrated to each user's risk
- Developed 10+ Python trading strategies on live brokerage APIs; raised INR 3.5M and served four paying clients

PROJECTS

- **Bobby AI:** market assistant producing real-time updates and scenario analysis from a user's profile via research retrieval and tool use
- **Derivatives Pricing in Python:** Black-Scholes for European and binomial trees for American options, with numerical Greeks

TESTS, CERTIFICATIONS AND SKILLS

Tests: GRE 318 (Quantitative 167, Verbal 151)
